Jain Narrow Fabrics is the flagship company of Jain group and was founded in 1952, manufacturing Elastic tapes & Webbing, based in India at Delhi and Haryana. Being marketed under the brand name VIVIA with continuous modernization of plant equipment, Jain Narrow Fabrics has grown to become a leading manufacturer globally

Our strength lies in our quality, commitment and vast experience to produce customized products to fulfil the requirement of our customers to best of our capabilities. With a well-built manufacturing base and excellent process, we aspire to outshine in providing inventive products through our experience in this sector.

Our team consists of experts who have professional approach and undertake strict quality measures to provide timely services at affordable prices. This has resulted in an overwhelming response from our customers and has lead us to build loyalty towards our brand VIVIA.

We aspire to offer the customers a wide product portfolio maintaining stringent quality standards.

We are equipped with highly advanced computerized & mechanical machines to manufacture Woven elastic from 3mm to 500mm, Knitted elastic from 2mm to 600mm, Braided elastic from 1mm to 15mm, cords, tapes and webbings. We assure to provide our products in any colour, width of design according to the customer

We produce 1.5 million meters of Narrow Fabrics (elastic) tapes everyday with all processes including preparation, weaving, knitting, braiding, finishing, testing and QA. Further, we are looking forward for good business relationship with you.

Our Social Responsibility

We realize what the Nature & Society gives us and we make sure to give back by doing multiple activities

- We only use filtered RO water to process our products so that the PH levels stay neutral and doesn't affect the human skin in any manner.

- The water is re-harvested and used for various sanitary processes. Keeping our technology & processes up to date, we ensure 0 discharge of any harmful substances in our manufacturing.

- Jain Narrow Fabric's inhouse training centre gives training to rural women & uneducated youth and help them become skilled labourers

- We plant multiple trees and plants at Jain Narrow Fabric, this by now has given us our very own green belt around our occupied area

Specifications & Specialities

Colours & Designs are customized, Packaging & Packing to suit individual clients needs are given prime importance. However we are geared to meet the clients specifications in size and designs

Future Plans

We at **Jain Narrow Fabrics** plan to upgrade our built up are for operations to

2. lack sq feet with over 400 dedicated machines from 250 machines currently. Looking forward to adapting CDR dyeing we aim at a production capacity of

3. 5mn metres daily by 2022. We plan to expand our export horizon to South Africa, UAE, Canada & China with a plan to incorporate Digital printing in the current financial year 2020-21.

Procurement

Jain Narrow Fabric only deals with a limited and specialised suppliers of yarn, rubber & spandex. We make sure to only procure from India's top and leading suppliers

Logistics

Jain Narrow Fabric has its own dedicated logistics and transport department which ensures a hassle free process and on time deliveries.

Infrastructure

Located in capital of India at Delhi, NCR Haryana, **Jain Narrow Fabrics** functions with every amenity and expertise available anywhere in the world. It has built-up area of 2,00,000 sq.ft. with more than 250 machines and yield an effective output of 1 million mtrs per day

We are using KAY, YE TCH, COMEZ, Fei Hong, dahu, prashant texmach, jc, MULLER, JIAYI, JINGYI, SHARP machines for knitting, weaving, covering, braiding, rolling, finishing & packing of elastics tapes and webbings.

A complete design and development facility for designing, scanning, exposing & digital printing is available in-house to eliminate compromises in quality and delay in production and reduction in costs

Our Team

Jain Narrow Fabrics is now managed by 4th generation of highly experienced. and specialised team of personnels carefully looking after each step of the multi level process of getting you the best quality of elastics.

Research Development & Testing

Equipped with a state of the art inhouse research developement and testing centre helps us run tests like AEPO, NPEO, Phenolic Yellow & Shrinkage to have the best quality output and generate inhouse reports as per customer requirements

Our designing department is constantly engaged in the creation on new patterns and designs. Designs & Colours to suit clients specifications and special needs are created by us with multiple options of raw materials Cotton, Polyester, Spun Polyester, Nylon, Rayon, & Bright Polyester. Superior heat -resistant rubber thread and spandex yarn are the base of our Elastic Tapes.

We procure our raw material from leading companies like Rubfilla International Ltd., Sanathan Textiles Pvt. Ltd., Indo Rama Synthetics Ltd., Reliance Industries Ltd., Modern Petrofils Ltd., Alok Industries Ltd. & B K Dyeing

Our research technicians, with international training and experience, are involved in constant research to produce better and superior quality elastics & webbings for greater comfort and durability

Elastics for Ladies & Gents inner wear with lighter smoother textures are constantly evolved in our research and development department. Longer lasting Fancy Yarns which are economical & effective are also part of our research & innovation.

Thinner and soft elastic and tapes for seamless look and feel are part of our areas of concentration. Research is also focused on effective quality testing to ensure that deviations (if any) remain within permissible limits. The goal is to achieve zero deviation at all times.

Our Global Footprint

JNF exports to the above marked countries

USP'S

-  • We at Jain Narrow Fabric do not have any minimum order quantity we believe in serving everyone from large organisations to young start ups
-  • Orders are customer specific in terms of color and quality. Our in-house training facility helps us ensure the maximum level of quality as per required by each and every particular customer.
